Message from the Editor

Dear ICSA community members,

Another year, not without its own surprise and drama, has almost elapsed. Albeit platitudinous, all reminded me of Dickens' omniscient quote, "it was the best of times, it was the worst of time, it was the age of wisdom, it was the age of foolishness, it was the epoch of belief, it was the epoch of incredulity, it was the season of light, it was the season of darkness, it was the spring of hope, it was the winter of despair." Such sentimentality, to some extent, probably only reflects the uneventfulness of the life of my generation, compared with those who experienced wars and sweeping turmoil.

But it is the best of times indeed, for sociology and our association. Coupled with America's (belated) pivot to Asia, our association had this year's annual conference successfully held in an Asian country and presided by our sitting president, Prof. Xiaoguang Wu, at NYU-Shanghai. Although I wasn't able to attend it for various reasons, mostly because of the pandemic, I see many familiar names in the program brochure, including Professors Stephen Raudenbush, Nan Lin, and Min Zhou, all of whose works have been the source of inspiration for my own teaching, research, and even life. The pandemic, its concurrent sociopolitical tensions, and cultural and ideological warfare provide research opportunities that've made possible several unfortunate but natural social-behavioral experiments and invited us to revisit a plethora of grand and middle-range theories in sociology. It is exciting to see an explosive outgrowth of research enterprises and projects masterfully executed with sophisticated empirical and theoretical design, not only in North America, but also other continents in the world, especially in the Greater China region.

While being astonished by all the new developments in our discipline, I may still have to lament the similitude of uneventfulness between natural and social sciences in an era absent heroism and polymath. Although human beings have witnessed unprecedented advances in technology and their applications of amazement in recent years, the golden grail of natural science, mathematics and physics, still awaits the refreshing unifying grand theory/narrative, for example, a theory that can integrate the four forces in physics. Social sciences appear to ail from such placidity too. Grand narratives appear to die off in

research—or even worse, in scholarly endeavors—insomuch as I have to ask if theory is in demise after all the preceding theoretical movements and we are in an epoch of "elegant mediocrity." As well argued by many historians and political scientists, fortunately, an era of renaissance and enlightenment usually ensues darkness, dispute, and disruption, and I do see some sparks from "the season of light." Machine learning has made AI technology malleable for application in both natural and social sciences. Complex system research won this year's Nobel Prize in physics and has even found its stronghold in social science. Maybe, only maybe, there is a place for thermodynamics of evolution in explaining the vicissitudes of human societies and cultures; or, the truth is fragmented and segmented after all, and the search for an overarching all-encompassing grand narrative will end in futility. Who knows. But the search has to go on.

To conclude, I want to congratulate those who have made impressive accomplishments in research, teaching, and service within and without our community during the last calendar year. Wish you a happy and healthy end of the year of ox, and a productive and peaceful year of tiger. Happy holidays!

Sincerely,
Jun Xu, PhD

ICSA 2021 Annual Conference in Shanghai, China

The news article was written by Center for Applied Social and Economic Research (CASER), NYU Shanghai
https://caser.shanghai.nyu.edu/nyu-shanghai-hosts-international-chinese-sociological-associations-first-conference-in-china/

Some 110 scholars and students from around the world convened in person and online at NYU Shanghai last month to tackle the theme of "Migration, Urbanization and Community Governance" at the fourth annual conference of the International Chinese Sociological Association (ICSA). Hosted by NYU Shanghai's Center for Applied Social and Economic Research (CASER) November 20-21, the conference was the association's first annual meeting to be held in China.

"Migration and urbanization are trends that will shape China's socio-economic trajectory for decades to come," said CASER Director and Yufeng Global Professor of Sociology Wu Xiaogang, who is also the ICSA's inaugural president. "The emerging urban/metropolitan life has not only posed great challenges to people's livelihood and social governance but has also become a research frontier for social scientists."

Conference keynote speaker and Lewis-Sebring Distinguished Service Professor of Sociology at the University of Chicago, Stephen Raudenbush, introduced his team's research and key findings on neighborhood collective efficacy – the capacity of neighbors to work together to achieve common goals

– in Chicago-area neighborhoods and their implications for cross-national research based on his recent living experience in Shanghai.

"A comprehensive study of Shanghai's residential committees, using today's methods, would possibly be a landmark project," Raudenbush said.

Professor Zhou Min, Distinguished Professor of Sociology & Asian American Studies at the University of California at Los Angeles, also delivered an online plenary speech entitled "International Migration and Urban Transformation: the Case of Los Angeles, USA." Zhou showed how international migration has changed the nature, shape, and social fabric of metropolitan Los Angeles, and how urban development has affected subsequent migration flows, alternately facilitating or hindering immigrant resettlement and integration. These findings shed new light on the ebbs and flows of growth and urbanization in several Chinese metropolitan areas.

The conference also celebrated emerging young scholars with the awarding of the Nan Lin Graduate Student Paper Award to Mr. Wang Yapeng (PhD Candidate at the University of Virginia) for his paper entitled "Closing the Gender Gap in College Attendance: Variation by Family Background in China Over Time." The ICSA board also announced the launch of a new fundraising program to establish an Early Career Award in honor of Xie Yu, Bert G. Kerstetter '66 University Professor of Sociology at Princeton University, to recognize his pioneering contributions to scientific research on Chinese societies, his significant contributions to the ICSA and its predecessor the North American Chinese Sociological Association (NACSA), and his mentorship of and inspiration to future generations of scholars.

The conference culminated in five parallel sessions in which researchers introduced and discussed a total of 81 papers on topics including migration and urbanization, residential segregation, education, marriage and family, and public health.

Achievement and Awards

Lijun Song - Vanderbilt University

- **Best Publication Award, Sociology of Mental Health Section, American Sociological Association: Song, Lijun. 2020. "Social Capital, Social Cost, and Relational Culture in Three Societies." *Social Psychology Quarterly* 83(4): 443-462.**

Students on the Job Market

Yapeng Wang – University of Virginia

Yapeng Wang is a Ph.D. candidate in the Department of Sociology at the University of Virginia. He is interested in social stratification, sociology of education, and quantitative methods. His dissertation provides new insights into understanding class and gender inequality in higher education in the U.S. through comparing Asian Americans with other racial/ethnic groups. Prior stratification research has rarely paid attention to Asian Americans, whose patterns often deviate from widely accepted accounts of inequality. For example, while it is well established that family background is related to educational success, that pattern does not hold for Asian Americans. Using nationally representative data, he shows that family background plays a limited role in fostering educational success of Asian Americans relative to other racial/ethnic groups, and that peer influence is an important factor contributing to these differences. Similarly, cultural capital is not related to educational success of Asian students, illuminating how the role of cultural capital varies across racial/ethnic groups and revealing the importance of considering other cultural resources that students may draw on from their ethnic communities. In the final chapter, he examines how the stereotypes related to math ability, which are shared by both Asians and men, interact to create unique gender differences across racial/ethnic groups in obtaining STEM degrees.

In addition, he is interested in a series of questions regarding inequality in higher education in China. His recent research has been published in *Social Science Research*, *Research in Social Stratification and Mobility*, and *Journal of Diversity in Higher Education*. For more information, please visit his personal website: https://www.yapengwang.net, or contact him: yw6zd@virginia.edu.

Call for Book Proposals

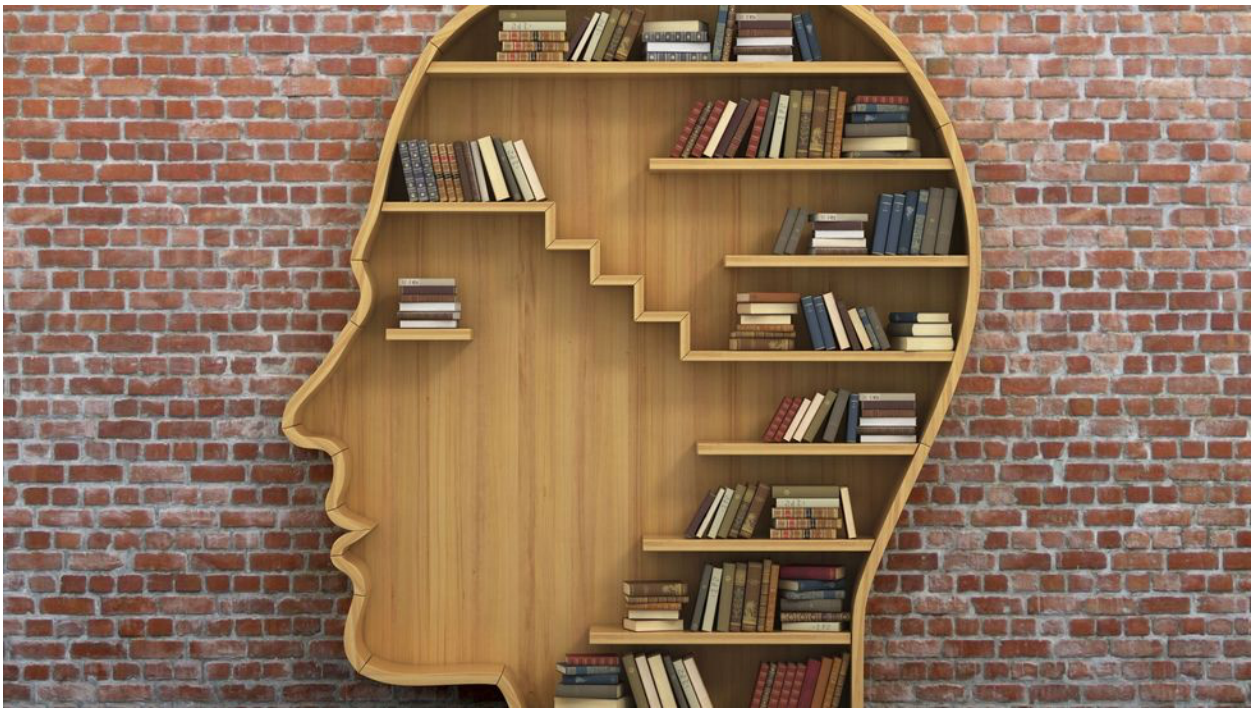
Call for Book Proposals – Routledge Research on the Politics and Sociology of China

- **Overview and Rationale:**

This book series is interested in examining the politics and sociology of contemporary China. As a guiding principle, the series is notably interested in books that utilize China as a laboratory for confirming, modifying or rejecting existing mainstream theories in political science and/or sociology.

- **Proposal Submission Procedures:**

Please forward your book proposal and CV to the Series Editors: Professors Reza Hasmath (rhasmath@gmail.com) and Jennifer Hsu (jenniferhsu@cantab.net).
https://journals.sagepub.com/doi/abs/10.1177/0730888421101697 4?journalCode=woxb



Job Opportunities

The Department of Sociology at the University of South Florida seeks candidates who specialize in social aspects of health, illness, and/or disability to fill a nine-month, full-time, tenure-earning position as Assistant Professor to begin August 7, 2022. This position aligns with two of USF's areas of strategic emphasis – health and social justice.

Miscellaneous Announcements

Min Zhou - University of California, Los Angeles

Min Zhou Edited and published a special issue for the *Journal of Chinese Overseas* (vol. 17, no. 2, pp. 1-8, 2021) on diasporic Chinese entrepreneurship.

Call for Contribution to the ICSA's Yu Xie Early Career Award Fund

Dear ICSA Friends and Colleagues,

We are writing to encourage you to contribute to a new fundraising program, unanimously approved by the Board of the International Chinese Sociological Association (ICSA), in honor of Dr. Yu Xie. The fund (entitled "The Yu Xie Early Career Award Fund") will be used to reward young scholars engaging in innovative research on Chinese societies. Our fundraising target is $25,000.

Dr. Yu Xie is Bert G. Kerstetter '66 University Professor of Sociology and PIIRS at Princeton University. As a world-renowned and highly respected sociologist/social scientist, his work has made important contributions to the fields of social stratification, demography, statistical methods, sociology of science, and Chinese studies. He is an elected member of the American Academy of Arts and Sciences, the Academia Sinica, and the National Academy of Sciences, and he is also the Founding Director of the Paul and Marcia Wythes Center on Contemporary China at Princeton University. The Center sponsored the inaugural conference of the ICSA in 2018.

Dr. Xie has been very active in promoting empirical social science research in China. He has been the Visiting Chair Professor at Peking University (PKU) since 2011, where he has directed the China Family Panel Studies (CFPS), the largest national longitudinal social science data collection project in the country, and he founded the Center for Social Research at PKU. He has also been active at several other institutions in the Greater China Region, holding honorary adjunct professorships at Renmin University of China, Hong Kong University of Science and Technology, Chinese University of Hong Kong, and Shanghai University, and mentoring dozens of graduate students and post-doctoral scholars.

The ICSA Board has decided to name the Early Career Award after Dr. Yu Xie to recognize his pioneering contributions to scientific research on Chinese societies, his significant contributions to the Association, and his mentorship of and inspiration to future generations of scholars of China.

The Yu Xie Early Career Award will be given annually or biennially to recognize a junior scholar (within 6 years of receiving his/her Ph.D. degree) who has made important contributions to the sociological study of China. Nominees must hold the ICSA membership and join the ICSA before the award is given. Self-nominations to the committee are welcome. Unawarded nominations will be automatically reconsidered for a period of three years. The award recipient will be announced in the ICSA annual conference, and receive a plaque and a cash prize of US$ 600. The cash prize will be drawn from the bank interests of the Yu Xie Early Career Award Fund.

To reach the fundraising goal in Dr. Yu Xie's honor, we are writing to his colleagues, collaborators, students, postdocs, and friends to make a request for support. Yu Xie has been a colleague, mentor and friend to many of us throughout our careers. We know that you have many opportunities to make worthy charitable donations. We hope that you will consider supporting the ICSA community in honoring Yu Xie's contributions. You do not need to be an ICSA member in order to make a donation. We will gladly publish the names of contributors on the ICSA website (http://www.icsa-sociology.org/).

You can make your donation in two ways. You can donate online via the PayPal Giving Fund (https://www.paypal.com/us/fundraiser/charity/1705707). PayPal covers all fees. After you donate online, you will receive your PayPal Giving Fund tax receipt by email.

The other way is to mail a check (with "International Chinese Sociological Association" on the pay-to-order line and "Yu Xie Award Fund" on the memo line) to the following address. After receiving your check, ICSA will send you a receipt by email.

Please feel free to forward this message to other colleagues, collaborators and friends of Yu Xie. Thank you for your consideration and kind support!

The ICSA Board

谢宇早期职业成就奖励基金募集

亲爱的 ICSA 会员和朋友们，

我们写这封信是想鼓励大家参与国际华人社会学协会 (ICSA) 理事会 2020 年全票通过的一项筹款计划，以表达对本会终身会员谢宇博士的敬意。该基金（名为"The Yu Xie Early Career Award Fund"）将用于奖励从事创新性中国社会研究的青年学者。我们的筹款目标是 25,000 美元。

谢宇博士是普林斯顿大学社会学的 Bert G. Kerstetter '66 大学教授、普林斯顿国际与区域研究中心教授。作为享誉全球、备受尊敬的社会学家与社会科学家，他对社会分层、人口学、统计方法、科学社会学和中国研究等领域做出了重要贡献。他是美国国家科学院院士、美国艺术与科学院院士、台湾中央研究院院士，也是普林斯顿大学 Paul and Marcia Wythes 当代中国研究中心主任。

谢宇博士一直在积极推进中国的实证社会科学研究。自 2011 年以来，他一直担任北京大学的客座讲席教授，并在那里主持了中国最大的纵贯社会科学数据收集项目——中国家庭追踪调查 (CFPS)，同时在北大创立了社会研究中心。他还活跃于大中华地区的其他几所科研机构，包括在中国人民大学、香港科技大学、香港中文大学和上海大学担任兼职教授，并指导了数十名研究生和博士后学者。谢宇教授为本会活跃的资深会员。他所领导的普林斯顿大学中心当代中国研究中心曾赞助举办 2018 年 ICSA 更名之后的首届年会。

ICSA 理事会决定以谢宇博士的名字命名"早期职业成就奖"（The Yu Xie Early Career Award），以表彰他对中国社会科学研究的开创性贡献、对协会的重大贡献与对中国新生代学者的指导和启迪。

The Yu Xie Early Career Award 将每年或每两年颁发一次，以鼓励对华人社会研究做出重要贡献的青年学者（需在获得博士学位后 6 年内）。被提名人必须为 ICSA 会员，或在颁发奖项前加入 ICSA。我们也接受自荐。未获奖的提名人将自动于三年后重获评估。获奖人选将于 ICSA 年会期间公布，同时得到一块奖牌和 600 美元的现金奖励。现金奖励将来自于 Yu Xie Early Career Award 基金的银行利息。

为实现本基金的筹款目标，我们谨在此请求谢宇博士的同事、合作者、学生、博士后和朋友们的帮助。在我们的职业生涯中，谢宇一直是我们很多人的导师、同事和好友。您有很多机会进行其他有价值的慈善捐赠，但我们真诚地希望您能考虑支持 ICSA，以感激谢宇博士的贡献。您无需成为 ICSA 会员就能进行捐赠。我们将在 ICSA 的官网 (http://www.icsa-sociology.org/) 上公布捐献者的姓名。

您可以通过两种方式捐款：第一种方式是 PayPal Giving Fund (https://www.paypal.com/us/fundraiser/charity/1705707) 在线捐款（您可点击文末"阅读原文"进入该网页）。PayPal 承担所有费用。在您在线捐款后，您将通过电子邮箱收到您的 PayPal Giving Fund 税收收据。另一种方式是将支票（请在支付订单行注明"国际华人社会学会"，以及在备注行注明"谢宇奖励基金"）邮寄到以下地址；收到您的支票后，ICSA 会邮寄收据给您。
